

LIST OF CONTENTS

Number 1

Articles

- | | | |
|---|-----------|--|
| L. K. Matthews, R. Sierra and
N. Bergan (U.S.A.) | 1 | Measurement of temperatures in fibrous insulators subjected to concentrated solar radiation |
| T. B. Scheffler (South Africa) | 9 | Energy balance for variable volume storage |
| Dennis L. Larson (U.S.A.) | 11 | Operational evaluation of the grid-connected Coolidge solar thermal electric power plant |
| H. Salt and K. J. Mahoney
(Australia) | 25 | An active charge, passive discharge floor space heating system |
| Richard Perez, Ken Webster,
Robert Seals,
Ronald Stewart and
James Barron (U.S.A.) | 33 | Variations of the luminous efficacy of global and diffuse radiation and zenith luminance with weather conditions—description of a potential method to generate key daylight availability data from existing solar radiation data bases |
| J. I. Ajona and J. M. Gordon
(Israel) | 45 | An analytic model for the long-term performance of solar air heating systems |
| Gladius Lewis (U.S.A.) | 55 | The applicability of diffuse solar radiation models to Huntsville, Alabama |
| S. M. Habali,
M. A. S. Hamdan,
B. A. Jubran and
Adnan I. O. Zaid
(Jordan) | 59 | Wind speed and wind energy potential of Jordan |

Number 2

Articles

- | | | |
|---|-----------|---|
| M. A. Al-Abbasi,
Ahlam J. Abdul-Ghani
and B. A. Ziada (Iraq) | 71 | A liquid solar collector |
| Adel M. A. Khalifa,
M. M. A. Taha and M. Akyurt
(Saudi Arabia) | 79 | Design, simulation, and testing of a new concentrating type solar cooker |
| A. Louche, M. Maurel,
G. Simonnot, G. Peri and
M. Iqbal (France) | 89 | Determination of Ångström's turbidity coefficient from direct total solar irradiance measurements |
| S. Jeevananda Reddy
(Mozambique) | 97 | The estimation of global solar radiation and evaporation through precipitation—a note |

R. S. Soin, S. Raghuraman and V. Murali (India)	105	Two-phase water heater: model and long term performance
Jong Ho Lee, Mo Chung and Won-Hoon Park (Korea)	113	An experimental and theoretical study on the corrugated water-trickle collector
X. A. Wang, Y. F. Xu and X. Y. Meng (China)	125	A filter method for transient testing of collector performance
J. Srinivasan and Abhijit Guha (India)	135	Concentration profile in the gradient zone of small solar ponds
		<i>Book Reviews</i>
John Littler	137	<i>The Complete Solar Home Book</i> by Brad Schapp
S. V. Szokolay	137	<i>First EC Conference on Solar Heating</i> , edited by C. Den Ouden
A. R. Despic	138	<i>Hydrogen as an Energy Carrier</i> , edited by G. Imarisio and A. S. Strub
T. W. Greeves	138	<i>Energy and Structural Change in the Asia Pacific Region</i> , published by the Philippine Institute for Development Studies
A. Dewint	139	<i>Renewable Energy in Cities</i> by the Center for Renewable Resources
A. Harriman	139	<i>Photoelectrochemistry, Photocatalysis and Photo-reactors, Fundamentals and Developments</i> , edited by M. Schiavello

Number 3

		<i>Articles</i>
S. S. Prakash, J. Clair Batty and J. Paul Riley (U.S.A.)	141	An investigation of a surface drift current return pipe system for application on salt gradient solar ponds
K. Prajuntaboribal and N. Chaikum (Thailand)	149	Photogalvanic effect in the riboflavin-diethanolamine system
J.-L. Scartezzini (Switzerland)	155	Performances of a water hybrid collector powered by a solar pump
D. A. Anati (Israel)	159	Salinity profiles in steady-state solar ponds
David Govaer (U.S.A.)	165	Apparent thermal conductivity of a local adobe building material
G. Y. Saunier, T. A. Reddy and S. Kumar (Thailand)	169	A monthly probability distribution function of daily global irradiation values appropriate for both tropical and temperate locations

- | | | |
|---|-----|---|
| S. Chakraverty, N. K. Bansal
and H. P. Garg (<i>India</i>) | 179 | Transient analysis of a CPC collector with time dependent input function |
| M. A. Sattler, S. Sharples
and J. K. Page (<i>England</i>) | 187 | The geometry of the shading of buildings by various tree shapes |
| D. A Kouremenos,
K. A. Antonopoulos and
S. Doulgerakis (<i>Greece</i>) | 203 | Direct and diffuse solar radiation correlations for tilted surfaces in Athens, Greece |

Number 4

Articles

- | | | |
|---|-----|---|
| Thomas L. Webster,
J. Pascal Coutier,
J. Wayne Place and
Mehdi Tavana (<i>U.S.A.</i>) | 219 | Experimental evaluation of solar thermosyphons with heat exchangers |
| K. G. T. Hollands and
S. J. Crha (<i>Canada</i>) | 233 | An improved model for diffuse radiation: correction for atmospheric back-scattering |
| K. G. T. Hollands and
S. J. Crha (<i>Canada</i>) | 237 | A probability density function for the diffuse fraction, with applications |
| V. Bădescu (<i>Romania</i>) | 247 | Can the model proposed by Barbaro <i>et al.</i> be used to compute global solar radiation on the Romanian territory? |
| D. L. Pulfrey, P. R. B. Ward
and W. G. Dunford (<i>Canada</i>) | 255 | A photovoltaic-powered system for medium-head pumping |
| Manuel Castaños,
Alfonso Soler and
Felix Soriano (<i>Spain</i>) | 267 | Theoretical maximal efficiency of diffuse radiation |
| Arvid Skartveit and
Jan Asle Olseth (<i>Norway</i>) | 271 | A model for the diffuse fraction of hourly global radiation |
| B. Herrmann, H. Karl, E. Kopf
and G. Lehner (<i>F.R.G.</i>) | 275 | Realistic indoor testing of photovoltaic water pumping systems |
| L. Adell, R. Zubiaur, F. Martín,
F. Ferrando, P. Moreno,
L. Varona and A. Pantoja
(<i>Spain</i>) | 281 | Development of a methodology for the estimation of wind energy resources in relatively large areas: application to the eastern and central parts of Spain |
| G. L. Harding and S. Craig
(<i>Australia</i>) | 297 | Thermosiphon heat extraction and automatic freeze protection in a hot water system incorporating evacuated solar collectors |

Number 5

Articles

- | | | |
|---|-----|---|
| A. H. Fanney and S. A. Klein
(U.S.A.) | 303 | Comparison of experimental and calculated performance of integral collector-storage solar water heaters |
| J.-P. Fohr and
A. R. Figueiredo (<i>France</i>) | 311 | Agricultural solar air collectors: design and performances |
| Yair Zarmi (<i>U.S.A.</i>) | 323 | Fluctuations in long-term performance of solar devices: the single-pass, open-loop hot water system example |
| D. Faiman, A. Zemel and
A. Zangvil (<i>Israel</i>) | 327 | A method for monitoring insolation in remote regions |
| Brian E. Lee (<i>Hong Kong</i>) | 335 | Wind flow over roof-mounted flat plate collectors |
| P. P. Groumpos and
G. Papageorgiou (<i>U.S.A.</i>) | 341 | An optimal sizing method for stand-alone photovoltaic power systems |
| Stephen M. Turton (<i>Australia</i>) | 353 | The relationship between total irradiation and sunshine duration in the humid tropics |
| J.-L. Scartezzini, A. Faist and
J. B. Gay (<i>Switzerland</i>) | 355 | Experimental comparison of a sunspace and a water hybrid solar device using the LESO test facility |
| Christian Gueymard (<i>Canada</i>) | 367 | An anisotropic solar irradiance model for tilted surfaces and its comparison with selected engineering algorithms |

Number 6

In Memoriam

- | | | |
|--|-----|------------------------------|
| Peter E. Glaser (<i>U.S.A.</i>) | 387 | Dr. John Yellott (1908–1986) |
|--|-----|------------------------------|

Articles

- | | | |
|---|-----|--|
| J. F. Atkinson and
D. R. F. Harleman (<i>U.S.A.</i>) | 389 | Wind-mixing experiments for solar ponds |
| Ralph W. Matthews
(<i>Australia</i>) | 405 | Solar-electric water purification using photocatalytic oxidation with TiO ₂ as a stationary phase |
| M. Castro, J. Peire and
P. Martinez (<i>Spain</i>) | 415 | Five-year CESA-I simulation program review |
| Tadj Oreszczyn and
Barrie W. Jones (<i>U.K.</i>) | 425 | A transient test method applied to air heating collectors |
| Miguel G. Neumann and
Ieda A. Pastre (<i>Brazil</i>) | 431 | Energy transfer between basic dyes |

- | | | |
|--|-----|--|
| Bal M. Mahajan (U.S.A.) | 437 | Measurement of interzonal heat and mass transfer by natural convection |
| Martin D. España and Luis Rodriguez V. (Mexico) | 447 | Approximate steady-state modeling of solar trough collectors |
| G. F. Jones (U.S.A.) | 455 | Consideration of the heat-removal factor for liquid-cooled flat-plate solar collectors |
| | I | Volume 38 list of contents and author index |
